

PREBUILT BULKHEADS

UFP Industrial's prebuilt, ready-to-assemble bulkheads offer the perfect solution to all your bulkhead requirements. Tougher international shipping regulations make the right kind of bulkhead absolutely essential—because a holdup in port causes costly delays and unnecessary frustration. Our prebuilt bulkheads are ISPM certified, come ready to assemble, and ship hassle-free.

CONSTRUCTION

- Panels are constructed from strong 3/8" plywood
- Three vertical 2x4s offer extra support and stability
- 1x4s add horizontal support between the 2x4s

ISPM CERTIFIED

To ensure compliance with international shipping regulations, the three 2x4 supports are conveniently stamped in the middle to assure the stamp is not cut off when the supports are fitted to the space between the load and the door.
