Cinch Sleep™ System

LOFT

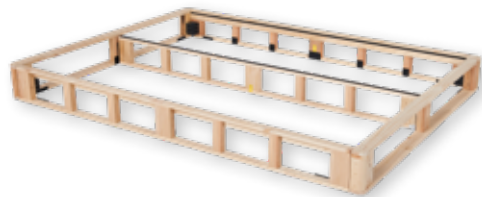

COMPLETE BED FOUNDATION KIT

FEATURING FAST-LOC CORNER BLOCKS

The Fast-Loc blocks connect without tools – foundation is ready to use in less than 10 minutes.

Fast, no-tools- required assembly

LOFT: THE MOST VERSATILE KITTED BED FOUNDATION

Convenient and simple, the Cinch Sleep™ Loft Bed Foundation Kit goes together in 5 minutes. The Fast-Loc connection system requires no tools or metal fasteners, making it quick and easy to assemble and disassemble.

The Loft serves as a foundation and can be used with or without most metal bed frames. And it pairs perfectly with any mattress. No need to move a box spring up and down narrow, switchback stairways. Because the Loft simply connects together, it can easily be transported, stored and installed virtually anywhere. It's also perfect as a temporary sleep solution for cottages, lake houses and dorms.

Cinch Sleep's Loft Bed Foundation can be used on any floor or hard surface, or use it on a metal bed frame.
