

All your skid needs from one source

UFP Industrial can custom build skids to meet any need – from small to gigantic. We carefully blend functionality, durability, performance and cost control into each solution. By following battle-tested design and engineering protocols, we consistently deliver solutions that are not over-designed and expensive or under-designed and unreliable. Our team understands the nuances required to package a wide range of products, including heavy equipment, engines and drivetrains, boilers, metal stamping, robotics and more.

Throughout the world, we're known as the leading designer and builder of containers and carriers that maximize performance while minimizing costs. We carefully blend functionality, durability, and cost control into each solution. No matter the challenge, we have the designers, engineers, and testing expertise to improve performance and increase confidence.
